

1    **Abstract of Disclosure**

2    A tool-holding apparatus is provided for holding at least one tool.    The  
3    tool-holding apparatus includes a board and at least one holder formed on  
4    the board.    The holder includes a root extending from the board, a tip  
5    extending from the root for pressing the tool, a restraint formed thereon  
6    near the tip for restraining the tool and a concave portion defined therein  
7    near the root for receiving the tool.
